PROFESSIONAL EXPERIENCE

Application Development Analyst, Accenture

09/2021 – 04/2023 | Hyderabad, India

- Developed and implemented web applications with the C#, ASP.NET, React.js, and MVC leading to a 20% increase in user experience and 30% in application performance.
- Collaborated with cross-functional teams to gather and refine project requirements, ensuring the successful delivery of software solutions.
- Implemented responsive web design techniques to enhance the usability of applications on different devices and screen sizes.
- Utilized Entity Framework for database interactions, optimizing data access and improving application efficiency.
- Developed and maintained RESTful APIs for seamless integration with external systems, resulting in improved data sharing and increased business process efficiency.
- Played a key role in the migration of legacy applications to the latest .NET framework, enhancing application performance and security.
- Developed and maintained complex database schemas, optimizing queries and improving data retrieval times.
- Collaborated with the testing team to identify and rectify software defects, resulting in a 20% reduction in post-release issues.
- Utilized Git for version control, ensuring code consistency and easy collaboration with team members.
- Proficient in using TFS for work item tracking, source control, build and release automation, and experienced in managing code and branches with GIT repositories.

Associate Professional Software Engineer, DXC Technology

03/2021 – 06/2021 | Hyderabad, India

- Developed a comprehensive Point-of-Sale (POS) web application.
- Received extensive training in full-stack Java development.
- Designed and developed RESTful APIs for seamless integration between frontend and backend systems.
- Utilized Java, Spring Boot, and Hibernate to develop the backend of the POS application, ensuring robust and scalable performance.
- Conducted thorough testing, including unit testing and integration testing, to ensure the reliability and robustness.
- Implemented microservices to enhance modularity and improve the maintainability of the application.
- Employed Jenkins for build automation and deployment, streamlining the development process.
- Conducted thorough analysis and design to build modern data solutions that met client requirements and industry standards.
- Worked closely with a team of developers, participating in code reviews, and ensuring adherence to best practices.

EDUCATION

Masters in Computer Science, UCM

05/2023 – 12/2024 | Lees Summit MO, United States

- Developed a MERN stack application named *TicketMaster* as part of my academic curriculum, demonstrating proficiency in full-stack development and practical application of modern web technologies.
- Developed an application named *Mind Mapping* using React.js for the frontend and Java Spring Boot for the backend, showcasing expertise in creating dynamic and efficient web applications with a robust and scalable architecture.

Bachelors in Electronics and Communication Engineering, Malla Reddy Engineering College

08/2017 – 06/2021 | Hyderabad, India

- Presented Seminar on AI and IOT on Topics: Arduino, Embedded C, Python, Machine Learning, Google Cloud.

Relevant Course Works:

Computer Programming, Data Structures, Advanced Calculus, Computational Mathematics, Probability, Computer Controllers, Software Quality Assurance and Testing.

SKILLS

Java | Python | C | JavaScript | C# | R | HTML | CSS

Bootstrap | React.js | Node.js | Express.js | Flask | .NET

ASP.NET | MVC | SQL | MongoDB | MATLAB | Scala

Power BI | GIT | Agile | Scrum

PROJECTS

Project Management Tool

- Developed a project management tool like Jira, designed to facilitate efficient project and team management.
- Users can create and manage multiple projects with ease. Ability to create teams and assign them to specific projects.
- Create, update, and track user stories throughout the project lifecycle. Assign user stories to team members, ensuring clear task distribution and accountability.
- Developed an intuitive and user-friendly interface with React.js, enhancing user experience.
- Implemented Node.js for efficient server-side operations, ensuring quick and reliable performance.
- Utilized MongoDB for flexible and scalable data storage, accommodating the dynamic nature of project and user story data.
- Employed GIT for effective version control, facilitating seamless collaboration and code management among team members.
- Streamlined the process of managing projects and user stories, improving overall productivity and project outcomes.

Face Recognition Security System

Developed a face recognition security system that integrates a camera and motors controlled by Arduino to grant door access only to recognized individuals. Real-time activities are logged on Google Firebase and visualized using a Streamlit dashboard.

- Face Recognition utilizes Python-based algorithms to accurately identify known individuals and grant access.
- Arduino Integration controls motors to unlock doors, enhancing physical security with electronic control.
- Real-time Logging logs all activities in real-time to Google Firebase, ensuring comprehensive record-keeping and monitoring.
- Data Visualization implements a Streamlit dashboard for real-time data visualization, providing a clear overview of access logs and system status.
- Python, Embedded C, Streamlit, Google Cloud, Firebase, Arduino.

Vivahaa

An app designed to assist users in planning Indian-style weddings by providing access to a wide range of vendors for venues, makeup, photography, decor, and more. The app enables users to book and contact vendors, manage checklists, track budgets, and read reviews, while allowing vendors to manage service postings, check bookings, and respond to user messages.

- Designed an intuitive and visually appealing interface with React.js, enhancing user experience.
- Implemented a scalable and efficient backend using Node.js, ensuring smooth and reliable app performance. Utilized MongoDB for dynamic data storage.
- accommodating a wide variety of vendor and user information.
- Facilitated seamless interaction between users and vendors, improving overall engagement and satisfaction. Streamlined the wedding planning process, making it more efficient and less stressful for users.
- Tools: React.js, Mongo DB, Bootstrap, JavaScript, HTML, CSS, Node.js

LICENSES & CERTIFICATIONS

- Microsoft Certified: SC-900 | Microsoft Certified: Az-900
