

EDUCATION & CERTIFICATIONS

MS in Computer Science: University of Central Missouri, Lees Summit, Missouri

May 2023 - Present

BTech in Electronics and Communication Engineering: Malla Reddy Engineering College, Hyderabad, India **Jul-2017 – Jun 2021**

Certifications: Microsoft Certified: SC-900 // Microsoft Certified: AZ-900

PROFESSIONAL SUMMARY

A versatile Full Stack Software Engineer with extensive experience in **application analysis, design, development**, and deployment, especially within the **healthcare insurance and pharmacy sectors**. I have successfully worked with stakeholders to define and implement business requirements, ensuring solutions align with both client needs and industry standards. With a proven track record in utilizing **.NET, C#, JavaScript, VB.net, SQL**, and **HTML5**, I specialize in building secure, scalable, and high-performance applications.

As a **technical lead**, I have coordinated the development, testing, and deployment of web applications, ensuring they meet business goals while adhering to IT security policies. I have a deep understanding of **BI reporting** using tools like **Power BI** and **Tableau** to generate actionable insights. My background includes performing **code and design reviews**, leading teams through full software development lifecycle processes, and troubleshooting bugs to maintain operational integrity.

Experienced in supporting and improving web applications and infrastructure, I've demonstrated excellent problem-solving skills and the ability to provide high-quality **technical end-user support**. My expertise in maintaining **ongoing job knowledge** ensures I remain up-to-date on the latest trends and techniques in software development, delivering value to both internal and external customers.

SKILLS

Software Development || CI/CD || JSON || Data Structures & Algorithms || Software Architecture || Problem-Solving || Version Control || TFS || Database Management || ORMs || Containerization || Rigorous Testing || RESTful API Development || Data Analysis || Project management || State Management || Collaboration || Root cause analysis || Quality assurance || Object Oriented Programming || AI || Agile || Cloud Security || Communication || Time Management || Adaptability || Attention to Detail || Positive Attitude || Innovation || Passion to Succeed || Develop creative solutions || Research || Design Thinking || New Technologies || Embracing Challenges || Application Security || Dedicated || Consistent Approach || Microsoft project || Microsoft excel || pivot tables || VBA || Advanced Excel || Microsoft word || Microsoft PowerPoint || Power BI

Backend Programming Languages: C#, Java, Python, Node JS, Express, C, .Net, .Net Core, ASP .Net MVC

Frontend Programming: React JS, Angular, HTML, CSS, JavaScript, Vue

Database: MySQL, NoSQL, MongoDB, PostgreSQL, GraphQL, IBM Db2, Entity Framework, ADO .Net, AWS & Firebase

Cloud Services: Azure, Google Firebase, AWS (EC2, Elastic Beanstalk, Amplify)

PROFESSIONAL EXPERIENCE

Team Lead, Full Stack Developer-University of Central Missouri, MO, USA

Jan 2024 – Aug 2024

- Led the development of **TICKET-MASTER**, a full-stack web app enabling users to view football matches, book tickets, manage bookings, and cancel reservations.
- Designed admin features to manage fixtures, stadium details, ticket pricing, and availability.
- Integrated secure **authentication/authorization** to protect match and ticket data.
- Used **Next.js** for server-side rendering and enhanced performance.
- Managed the database with **Prisma ORM**, optimizing schema design for efficient data handling.
- Built a flexible API using **GraphQL**, resolving over-fetching and under-fetching issues.
- Implemented complex queries and mutations in GraphQL for user/admin operations like ticket booking and fixture updates.

Custom Software Engineering Analyst, .Net Full Stack Developer-Accenture, Hyderabad, India

Dec 2022 – Apr 2023

- Led the **analysis, design, and development** of software applications for an Ohio-based health insurance company, ensuring solutions aligned with business needs and **IT security policies**.
- Collaborated with stakeholders to thoroughly define and document requirements, translating them into functional and technical specifications for development teams.
- Utilized development tools like **.NET, C#, JavaScript, VB.NET, SQL**, and **HTML5** to create and maintain secure, high-performance web applications, improving user experience by 20%.
- Served as the **senior software engineer** for the project, overseeing the coordination of development, testing, and deployment tasks to ensure timely and quality deliverables.
- Conducted **code reviews** and assisted in design reviews, promoting best practices and ensuring adherence to industry standards.

- Supported **BI reporting development** using **Power BI** to create customized reports, delivering key insights for the insurance business.
- Troubleshoot and resolved complex issues, ensuring high operational reliability and performance across all aspects of application usage.
- Provided **technical end-user support** to both internal and external customers, including troubleshooting application issues and offering mentorship to junior developers.
- Assisted the helpdesk team as needed to provide technical support, delivering **high-quality customer service** and ensuring smooth day-to-day operations.
- Actively participated in **ongoing training** to remain current in the latest software development trends and techniques, contributing to continuous process improvements.

Custom Software Engineering Associate – Accenture, Hyderabad, India

Sept 2021 – Nov 2022

- Developed cloud-native applications and **API integrations** into existing frameworks, with a focus on **Microsoft Azure** and **AWS technologies**, ensuring scalability and reliability for large-scale deployments.
- Collaborated with business units and **Solution Architect** teams to design software that met strategic business objectives.
- Led the integration of **relational databases** like **SQL Server** and **Oracle**, optimizing schema design and data retrieval to improve system performance.
- Utilized **.NET Core** and **Entity Framework** to manage secure, efficient data transactions and maintain the integrity of cloud-native systems.
- Supported deployment and troubleshooting efforts, resolving issues with production systems and ensuring **punctual attendance** during critical system launches.

C1 Engineer, Full Stack Developer – LTIMindtree, Bangalore, India

Jul 2020 – Aug 2021

- Developed apps with **Java**, **Spring Boot**, and microservices, improving UX by 30% and ensuring quick defect resolution.
- Used **Maven** for dependency management and **Jenkins** for **CI/CD** pipelines, optimizing builds and deployments.
- Designed **RESTful APIs** for seamless integration, enhancing data exchange and workflows.
- Managed **MySQL** databases, developing features like bank statements and transaction history.
- Automated tasks with **Python**, boosting productivity by 40% and reducing manual effort.
- Applied object-oriented programming for scalable, maintainable codebases.
- Collaborated with **DevOps** to automate build, test, and deployment processes with Jenkins, reducing deployment errors by 25%.
- Focused on performance optimization and faster processing times in banking solutions.
- Employed **Gradle** for build automation, enhancing deployment consistency.

Associate Professional Software Engineer, Java Full Stack Developer – DXC Technology, Hyderabad, India

Jan 2020 – Jun 2020

- Developed a **Point-of-Sale (POS)** web application, streamlining retail operations.
- Utilized **Java**, **Spring Boot**, and **Hibernate** for a scalable backend and **RESTful APIs** for frontend-backend integration.
- Implemented **microservices architecture** for modularity and maintainability.
- Conducted unit and integration testing to ensure application reliability.
- Employed **Jenkins** for build automation and deployment.
- Participated in code reviews to promote best practices and continuous improvement.

PROJECTS

Airline Website / MERN Stack, Python

Sept 2023 – Nov 2023

- Developed a full-featured **airline booking platform** allowing users to book and manage tickets, while airlines manage flight routes, schedules, and seating arrangements.
- Implemented flexible seating options (economy, business, first class) with dynamic pricing functionality.
- Implemented dynamic pricing features using **Python** and **REST APIs**, optimizing pricing based on real-time data and market demand.
- Built **customer support ticketing system** for user queries, enabling airlines to respond directly and track issues.
- **Automated email notifications** for ticket bookings, support tickets, flight schedule changes, and responses.
- Integrated a **Python script** for scheduled updates to the database, adjusting prices based on business needs.
- Utilized **React.js** for a dynamic, user-friendly interface and **Node.js** for server-side operations.
- Managed data using **MongoDB** for scalability and efficiency.

Project Management Tool / React JS, Node JS, MongoDB

Aug 2023 – Dec 2023

- Developed a cloud-native project management tool akin to **Jira** for managing projects and teams.
- Enabled creation and management of projects, teams, and user stories.
- Designed an intuitive UI with **React JS** and handled server-side operations with **Node JS**.
- Utilized **MongoDB** for scalable data storage and **GIT** for version control.
- Integrated **CI/CD pipelines** and used **Azure** for cloud deployment, ensuring real-time collaboration and system availability.

Face Recognition Security System / Python, AI, Machine Learning, Firebase, Arduino

Sept 2019 – Dec 2019

- Created a face recognition system integrating camera and Arduino for secure door access.
- Used **Python** for recognition algorithms and **Firebase** for real-time activity logging.
- Developed a data visualization dashboard for monitoring access logs and system status.
