

EDUCATION & CERTIFICATIONS

MS in Computer Science: University of Central Missouri, Lees Summit, Missouri

May2023 – Dec 2024

BTech in Electronics and Communication Engineering: Malla Reddy Engineering College, Hyderabad, India **Jul 2017 – Jun 2021**

Certifications: Microsoft Certified: SC-900 // Microsoft Certified: AZ-900

PROFESSIONAL SUMMARY

Versatile Software Engineer with 5+ years of experience and a solid foundation in programming languages like Python, C#, and Java, paired with hands-on experience in full-stack development using JavaScript frameworks like React.js and Node.js. Driven by a passion for learning and growth, I have contributed to team-based projects that emphasize problem-solving, system development, and verification across both front-end and back-end environments.

With a background in full-stack development, cloud technologies, and computer science fundamentals—including data structures, algorithms, and multi-threading—I bring a unique combination of technical skills and the adaptability to take on new challenges in a collaborative, cross-functional setting. My experience leading small development projects and working closely with diverse teams has prepared me to contribute creatively and effectively within an innovative and dynamic organization.

SKILLS

Software Development || CI/CD || JSON || Data Structures & Algorithms || Software Architecture || Problem-Solving || Version Control || TFS || Database Management || ORMs || Containerization || Rigorous Testing || RESTful API Development || Data Analysis || Project management || State Management || Collaboration || Root cause analysis || Quality assurance || Object Oriented Programming || AI || Agile || Cloud Security || Communication || Time Management || Adaptability || Attention to Detail || Positive Attitude || Innovation || Passion to Succeed || Develop creative solutions || Research || Design Thinking || New Technologies || Embracing Challenges || Application Security || Dedicated || Consistent Approach || Microsoft project || Microsoft excel || pivot tables || VBA || Advanced Excel || Microsoft word || Microsoft PowerPoint || Power BI

Backend Programming Languages: C#, Java, Python, Node JS, Express, C, .Net, .Net Core, ASP .Net MVC

Frontend Programming: React JS, Angular, HTML, CSS, JavaScript, Vue

Database: MySQL, NoSQL, MongoDB, PostgreSQL, GraphQL, IBM Db2, Entity Framework, ADO .Net, AWS & Firebase

Cloud Services: Azure, Google Firebase, AWS (EC2, Elastic Beanstalk, Amplify)

PROFESSIONAL EXPERIENCE

Applications Developer – KDOT, KS, USA

Dec 2024 – Present

- Designed, developed, and maintained enterprise applications using **C#, VB.NET, React.js, Node.js**, and **Python**, modernizing legacy systems and improving system responsiveness and user experience.
- Set up complete full-stack environments from scratch including frontend, backend APIs, build pipelines, and cloud infrastructure using **.NET, React.js, GitHub Actions**, and **Azure**
- Optimized backend logic and frontend performance, applied advanced debugging, and resolved critical defects—**reducing system downtime and saving operational costs** through improved reliability and faster recovery times.
- Engineered scalable data pipelines and microservices using **Docker, Kubernetes**, and **Lambda/Kappa architectures**, enhancing data processing and system throughput.
- Built CI/CD pipelines with **GitHub Workflows** and automated tasks with **PowerShell**, increasing deployment speed and **boosting team productivity by 35%**.
- Developed custom workflows, triggers, and automation on the **BMC Helix platform**, while supporting migration to open-source alternatives and integrating **REST/SOAP APIs** across internal and third-party systems.
- Administered open-source and NoSQL databases (**PostgreSQL, MongoDB, Elasticsearch**) and used monitoring tools like **Grafana** and **Prometheus** to ensure high system availability and performance.
- Supported secure deployments across **Windows Server environments**, collaborated cross-functionally with DevOps and business teams, and contributed to AI/ML-based solutions and predictive analytics initiatives.

Full Stack Developer -Perficient Corp, NC, USA

Aug 2024 – Dec 2024

- Develops and maintains **business applications**, including tasks such as defining and documenting **requirements and specifications**, designing data structures, and customizing program code for optimized business functionality.
- Leads system-level testing**, debugging, and break-fix tasks, ensuring smooth integration across multiple platforms.
- Documented change** to existing program code and **modify data structures** to correct errors or adjust business functionality, improving application efficiency and reliability.
- Coordinates with database and security teams to ensure that **data standards** and **security protocols** are followed, safeguarding data integrity.

- Works closely with stakeholders to **design, document, and monitor plans** for system implementations, acceptance testing, and conversions, ensuring seamless transitions to production.
- Engages in the development of technical workflows, validating system designs against **user requirements** and providing recommendations for system improvements.
- Responds to and documents **user requests**, helping to resolve system issues, provide system information, and suggest potential improvements.
- Acquires and applies new technical concepts and software languages as needed to address evolving business needs and enhance system performance.
- Maintains high organizational standards, consistently completing tasks in a **timely and high-quality manner**, minimizing rework and ensuring alignment with business strategies.

Team Lead, Full Stack Developer-University of Central Missouri, MO, USA

Jan 2024 – Aug 2024

- Led the development of **TICKET-MASTER**, a full-stack web app enabling users to view football matches, book tickets, manage bookings, and cancel reservations.
- Designed admin features to manage fixtures, stadium details, ticket pricing, and availability.
- Integrated secure **authentication/authorization** to protect match and ticket data.
- Used **Next.js** for server-side rendering and enhanced performance.
- Managed the database with **Prisma ORM**, optimizing schema design for efficient data handling.
- Built a flexible API using **GraphQL**, resolving over-fetching and under-fetching issues.
- Implemented complex queries and mutations in GraphQL for user/admin operations like ticket booking and fixture updates.

Custom Software Engineering Analyst, .Net Full Stack Developer-Accenture, Hyderabad, India

Dec 2022 – Apr 2023

- Spread headed development using **C#, ASP.NET, React.js**, and **MVC**, boosting UX by 20% and performance by 30%.
- Collaborated with cross-functional teams to deliver high-quality software.
- Applied responsive design and optimized data access via **Entity Framework**, enhancing efficiency.
- Developed **RESTful APIs** for integration with external systems, improving business processes.
- Migrated legacy apps to the latest **.NET framework**, enhancing security and performance.
- Optimized database schemas for faster data retrieval.
- Reduced post-release issues by 20% through collaboration with the testing team.
- Managed version control with **Git** and used **TFS** for source control and automation.
- Developed APIs with **Node.js** and **JavaScript** in a **CI/CD** environment.
- Worked with DevOps to automate the deployment pipeline, improving efficiency.

Custom Software Engineering Associate-Accenture, Hyderabad, India

Sept 2021 – Nov 2022

- Worked extensively with **C#, VB.NET**, and **ASP.NET**, developing custom business applications and ensuring seamless data integration and retrieval.
- Developed data manipulation processes and complex **data structures**, optimizing **database performance** and retrieval times.
- Debugged application programs using **Visual Studio**, identifying and fixing critical errors, leading to a 15% improvement in application stability.
- Coordinated and executed **system and regression testing**, documenting test cases and results for review.
- Assisted users in resolving system issues, advising on information system capabilities, and making recommendations for improvements.
- Maintained software on training equipment and developed training materials for user onboarding, ensuring smooth transitions to new systems.

C1 Engineer-Trainee, Full Stack Developer-LTIMindtree, Bangalore, India

Jul 2020 – Aug 2021

- Developed enterprise-level apps with **Java, Spring Boot**, and microservices, improving UX by 30% and ensuring quick defect resolution.
- Used **Maven** for dependency management and **Jenkins** for **CI/CD** pipelines, optimizing builds and deployments.
- Designed **RESTful APIs** for seamless integration, enhancing data exchange and workflows.
- Managed **MySQL** databases, developing features like bank statements and transaction history.
- Automated tasks with **Python**, boosting productivity by 40% and reducing manual effort.
- Applied object-oriented programming for scalable, maintainable codebases.
- Collaborated with DevOps to automate build, test, and deployment processes with Jenkins, reducing deployment errors by 25%.
- Focused on performance optimization and faster processing times in banking solutions.
- Employed **Gradle** for build automation, enhancing deployment consistency.

Java Full Stack Developer Intern-DXC Technology, Hyderabad, India

Jan 2020 – Jun 2020

- Developed a **Point-of-Sale (POS)** web application, streamlining retail operations.
- Utilized **Java, Spring Boot**, and **Hibernate** for a scalable backend and **RESTful APIs** for frontend-backend integration.
- Implemented **microservices architecture** for modularity and maintainability.
- Conducted unit and integration testing to ensure application reliability.
- Employed **Jenkins** for build automation and deployment.
- Participated in code reviews to promote best practices and continuous improvement.
- Monitored system performance and critical components of the IT infrastructure to ensure reliability and efficiency.
- Created **technical documentation** and conducted training sessions for system users, helping them better understand the applications.
