

LAXMANA MANESH JONABOINA

Software Engineer, Machine Learning

Overland Park, KS | Imanesh.jonaboina@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience building production-grade ML systems and full-stack applications. Proven ability to architect scalable microservices and RAG pipelines supporting predictive analytics. Expert in Python, distributed systems, and CI/CD automation, with a focus on optimizing system performance (99.9% uptime).

TECHNICAL SKILLS

Languages: Python (Expert), C, Java, C#, JavaScript, SQL, VB.NET

ML & Data: RAG, MongoDB Vector Search, Hugging Face, PyTorch, Embeddings, Predictive Analytics, ML Pipelines

Infrastructure: Docker, Kubernetes, GitHub Actions, Azure DevOps, Jenkins, Canary Rollouts

Databases: PostgreSQL, MongoDB, MySQL, IBM Db2, Elasticsearch, GraphQL

PROFESSIONAL EXPERIENCE

Kansas Dept of Transportation (KDOT) | Applications Developer | Dec 2024 – Present

- Architected an end-to-end data pipeline using Lambda/Kappa architectures, navigating complex architectural trade-offs to optimize latency.
- Developed predictive models analyzing historical crash data, collaborating via XFN (cross-functional) partnerships to inform safety workflows.
- Deployed scalable microservices and automated data pipelines using Docker and Kubernetes, achieving 99.9% uptime.
- Built and maintained robust CI/CD pipelines using GitHub Actions, automating testing to increase release velocity.

Perficient Corp | Full Stack Developer | Aug 2024 – Nov 2024

- Acted as DRI (Directly Responsible Individual) for service uptime, reducing downtime by 30% via dashboard monitoring.
- Developed backend features for enterprise applications using Python, ensuring Engineering Excellence through rigorous system testing.

Accenture | Custom Software Engineering Analyst | Sep 2021 – Apr 2023

- Set technical direction for high-performance web apps using C# and React.js, boosting UX scores by 20% and performance by 30%.
- Engineered Azure DevOps CI/CD pipelines, reducing release cycles by 40% and deployment errors by 30%.
- Optimized critical database queries via Entity Framework, leading to a 15% improvement in application stability.

LTIMindtree | Software Engineer | Jul 2020 – Aug 2021

- Implemented Jenkins-based canary rollouts, reducing deployment failures by 25%.
- Automated manual operational tasks using Python scripts, reducing engineering hours by 40%.

TECHNICAL PROJECTS

AI Medical Research Assistant (RAG & MongoDB)

- Engineered a RAG system using MongoDB Atlas Vector Search to index 4,000+ research articles with sub-second latency.
- Integrated LLMs to synthesize retrieved data into accurate, context-aware medical summaries.

Mental Health Sentiment Analysis (Hugging Face)

- Fine-tuned a Transformer model from Hugging Face for sentiment classification, optimizing for linguistic nuance.
- Developed a real-time UI using React.js and a Python backend to visualize sentiment trends.

EDUCATION & CERTIFICATIONS

MS in Computer Science | Univ. of Central Missouri | *Relevant Coursework: Machine Learning (Grade A)*

B.Tech in Electronics & Comm. Eng. | Malla Reddy Engineering College, India

Certifications: ML Statistical Foundations (Wolfram), Microsoft Certified: SC-900 & AZ-900
